Contents

Volume 103 1988

ESSAY IN DEVELOPMENT

Williams, J. G.
The role of diffusible molecules in regulating the cellular differentiation of *Dictyostelium discoideum* 1

CONTRIBUTED PAPERS

Watanabe, K., Aoyama, H., Tamamaki, N., Sonomura, T., Okada, T. S., Eguchi, G. and Nojyo, Y.
An embryonic pineal body as a multipotent system in cell differentiation 17

Hayashi, M., Ninomiya, Y., Hayashi, K., Linsenmayer, T. F., Olsen, B. R. and Trelstad, R. L.
Secretion of collagen types I and II by epithelial and endothelial cells in the developing chick cornea demonstrated by *in situ* hybridization and immunohistochemistry 27

Thomas, W. A. and Yancey, J.
Can retinal mechanisms determine cell-sorting patterns: a test of the differential adhesion hypothesis 37

Hanneman, E., Trevarrow, B., Metcalfe, W. K., Kimmel, C. B. and Westerfield, M.
Segmental pattern of development of the hindbrain and spinal cord of the zebrafish embryo 49

Krone, P. H. and Heikkila, J. J.
Analysis of hsp 30, hsp 70 and ubiquitin gene expression in *Xenopus laevis* tadpoles 59

Bagnall, K. M., Higgins, S. J. and Sanders, E. J.
The contribution made by a single somite to the vertebral column: experimental evidence in support of resegmentation using the chick–quail chimaera model 69

Repressa, J. J., Miner, C., Barbosa, E. and Giraldez, F.
Bombesin and other growth factors activate cell proliferation in chick embryo otic vesicles in culture 87

Stirling, R. V. and Summerbell, D.
Specific guidance of motor axons to duplicated muscles in the developing amniote limb 97

Devlin, C. J., Brickell, P. M., Taylor, E. R., Hornbruch, A., Craig, R. K. and Wolpert, L.
In situ hybridization reveals differential spatial distribution of mRNAs for type I and type II collagen in the chick limb bud 111

Bownes, M., Scott, A. and Shirras, A.
Dietary components modulate yolk protein gene transcription in *Drosophila melanogaster* 119

Howlett, S. K., Barton, S. C., Norris, M. L. and Surani, M. A. H.
Nuclear and cytoplasmic localization of newly synthesized proteins in the early mouse embryo 129

Gaunt, S. J.
Mouse homeobox gene transcripts occupy different but overlapping domains in embryonic germ layers and organs: a comparison of *Hox-3.1* and *Hox-1.5* 135

Piovant, M. and Léna, P.
Membrane glycoproteins immunologically related to the human insulin receptor are associated with presumptive neuronal territories and developing neurones in *Drosophila melanogaster* 145

Martinez Arias, A., Baker, N. E. and Ingham, P. W.
Role of segment polarity genes in the definition and maintenance of cell states in the *Drosophila* embryo 157

Surani, M. A., Barton, S. C., Howlett, S. K. and Norris, M. L.
Influence of chromosomal determinants on development of androgenetic and parthenogenetic cells 171

Chau, M. F. and Ng, S. F.
Interspecific micronuclear transplantation in *Paramecium*: nucleogenesis and stomatogenesis in asexual and sexual reproduction 179

Keller, R. and Danilchik, M.
Regional expression, pattern and timing of convergence and extension during gastrulation of *Xenopus laevis* 193

Contents

Hardin, J. and Keller, R.
The behaviour and function of bottle cells during gastrulation of *Xenopus laevis* 211

ESSAY IN DEVELOPMENT
Decker, G. L. and Lennarz, W. J.
Skeletogenesis in the sea urchin embryo 231

CONTRIBUTED PAPERS
Kolberg, K. J. S. and Martin, V. J.
Morphological, cytochemical and neuropharmacological evidence for the presence of catecholamines in hydrozoan planulae 249

Fukuda, Y., Masuda, Y., Kishi, J.-I., Hashimoto, Y., Hayakawa, T., Nogawa, H. and Nakanishi, Y.
The role of interstitial collagens in cleft formation of mouse embryonic submandibular gland during initial branching 259

Sharpe, C. R.
Developmental expression of a neurofilament-M and two vimentin-like genes in *Xenopus laevis* 269

Tang, P., Sharpe, C. R., Mohun, T. J. and Wylie, C. C.
Vimentin expression in oocytes, eggs and early embryos of *Xenopus laevis* 279

Baker, N. E.
Localization of transcripts from the *wingless* gene in whole *Drosophila* embryos 289

Urven, L. E., Erickson, C. A., Abbott, U. K. and McCarrey, J. R.
Analysis of germ line development in the chick embryo using an anti-mouse EC cell antibody 299

Wray, G. A. and McClay, D. R.
The origin of spicule-forming cells in a 'primitive' sea urchin (*Eucidaris tribuloides*) which appears to lack primary mesenchyme cells 305

Hardin, J.
The role of secondary mesenchyme cells during sea urchin gastrulation studied by laser ablation 317

Duband, J.-L., Volberg, T., Sabanay, I., Thiery, J. P. and Geiger, B.
Spatial and temporal distribution of the adherens-junction-associated adhesion molecule A-CAM during avian embryogenesis 325

Tsuchimori, N., Miyashiro, S., Shibai, H. and Ikegami, S.
Adenosine induces dormancy in starfish blastulae 345

Pickering, S. J., Maro, B., Johnson, M. H. and Skepper, J. N.
The influence of cell contact on the division of mouse 8-cell blastomeres 353

Wilson, S., Jesani, M. and Holder, N.
Reformation of specific neuromuscular connections during axolotl limb regeneration: evidence that the first contacts are correct 365

Tam, P. P. L.
The allocation of cells in the presomitic mesoderm during somite segmentation in the mouse embryo 379

Simpson, P., El Messal, M., Moscoso del Prado, J. and Ripoll, P.
Stripes of positional homologies across the wing blade of *Drosophila melanogaster* 391

Stuart, G. W., McMurray, J. V. and Westerfield, M.
Replication, integration and stable germ-line transmission of foreign sequences injected into early zebrafish embryos 403

ESSAY IN DEVELOPMENT
Keynes, R. J. and Stern, C. D.
Mechanisms of vertebrate segmentation 413

CONTRIBUTED PAPERS
Jaffredo, T., Horwitz, A. F., Buck, C. A., Rong, P. M. and Dieterlen-Lievre, F.
Myoblast migration specifically inhibited in the chick embryo by grafted CSAT hybridoma cells secreting an anti-integrin antibody 431

Roberts, A., Dale, N., Ottersen, O. P. and Storm-Mathisen, J.
Development and characterization of commissural interneurones in the spinal cord of *Xenopus laevis* embryos revealed by antibodies to glycine 447

Kay, B. K., Schwartz, L. M., Rutishauser, U., Qiu, T. H. and Peng, H. B.
Patterns of N-CAM expression during myogenesis in *Xenopus laevis* 463

Thaller, C. and Eichele, G.
Characterization of retinoid metabolism in the developing chick limb bud 473

Link, C. D., Ehrenfels, C. W. and Wood, W. B.
Mutant expression of male copulatory bursa surface markers in *Caenorhabditis elegans* 485

Stylianopoulou, F., Efstratiadis, A., Herbert, J. and Pintar, J.
Pattern of the insulin-like growth factor II gene expression during rat embryogenesis 497

Ressom, R. E. and Dixon, K. E.
Relocation and reorganization of germ plasm in *Xenopus* embryos after fertilization 507

Early, A. E. and Williams, J. G.
A *Dictyostelium* prespore-specific gene is transcriptionally repressed by DIF *in vitro* 519

Fleig, R. and Sander, K.
Honeybee morphogenesis: embryonic cell movements that shape the larval body 525

Kerr, J. B. and Knell, C. M.
The fate of fetal Leydig cells during the development of the fetal and postnatal rat testis 535

Rohrer, H., Hofer, M., Hellweg, R., Korsching, S., Stehle, A. D., Saadat, S. and Thoenen, H.
Antibodies against mouse nerve growth factor interfere *in vivo* with the development of avian sensory and sympathetic neurones 545

Hutchison, C. J., Cox, R. and Ford, C. C.
The control of DNA replication in a cell-free extract that recapitulates a basic cell cycle *in vitro* 553

Fekete, D. M. and Brockes, J. P.
Evidence that the nerve controls molecular identity of progenitor cells for limb regeneration 567

Picard, A., Labbé, J.-C. and Dorée, M.
Normal embryogenesis occurs in starfish eggs induced to mature by microinjection of cytoplasm containing maturation-promoting factor (MPF) 575

Slack, J. M. W., Isaacs, H. V. and Darlington, B. G.
Inductive effects of fibroblast growth factor and lithium ion on *Xenopus* blastula ectoderm 581

Smith, J. C., Yaqoob, M. and Symes, K.
Purification, partial characterization and biological effects of the XTC mesoderm-inducing factor 591

Falzon, M. and Chung, S. Y.
The expression of rat homeobox-containing genes is developmentally regulated and tissue specific 601

Wang, M., van Driel, R. and Schaap, P.
Cyclic AMP–phosphodiesterase induces dedifferentiation of prespore cells in *Dictyostelium discoideum* slugs: evidence that cyclic AMP is the morphogenetic signal for prespore differentiation 611

BOOKS IN DEVELOPMENT 619

Hay, B., Ackerman, L., Barbel, S., Jan, L. Y. and Jan, Y. N.
Identification of a component of *Drosophila* polar granules 625

Carrino, D. A., Oron, U., Pechak, D. G. and Caplan, A. I.
Reinitiation of chondroitin sulphate proteoglycan synthesis in regenerating skeletal muscle 641

Schiavone, F. M.
Microamputation of somatic embryos of the domestic carrot reveals apical control of axis elongation and root regeneration 657

Racusen, R. H. and Schiavone, F. M.
Detection of spatially- and stage-specific proteins in extracts from single embryos of the domesticated carrot 665

Kellogg, D. R., Mitchison, T. J. and Alberts, B. M.
Behaviour of microtubules and actin filaments in living *Drosophila* embryos 675

Martins-Green, M.
Origin of the dorsal surface of the neural tube by progressive delamination of epidermal ectoderm and neuroepithelium: implications for neurulation and neural tube defects 687

Toussaint, N. and French, V.
The formation of pattern on the wing of the moth, *Ephestia kühniella* 707

Stevens, M. E., Maidens, P. M., Robinson, E. S., Vandeberg, J. L., Pedersen, R. A. and Monk, M.
DNA methylation in the developing marsupial embryo 719

Hayashi, K., Yasugi, S. and Mizuno, T.
Pepsinogen gene transcription induced in heterologous epithelial–mesenchymal recombinations of chicken endoderms and glandular stomach mesenchyme 725

Dura, J.-M. and Ingham, P.
Tissue- and stage-specific control of homeotic and segmentation gene expression in *Drosophila* embryos by the *polyhomeotic* gene 733

Epperlein, H. H., Halfter, W. and Tucker, R. P.
The distribution of fibronectin and tenascin along the migratory pathways of the neural crest in the trunk of amphibian embryos 743

Ripoll, P., El Messel, M., Laran, E. and Simpson, P.
A gradient of affinities for sensory bristles across the wing blade of *Drosophila melanogaster* 757

Guthrie, S., Turin, L. and Warner, A.
Patterns of junctional communication during development of the early amphibian embryo 769

Schmidt, G. H., Winton, D. J. and Ponder, B. A. J.
Development of the pattern of cell renewal in the crypt–villus unit of chimaeric mouse small intestine 785

Plickert, G. and Kroiher, M.
Proliferation kinetics and cell lineages can be studied in whole mounts and macerates by means of BrdU/anti-BrdU technique 791

Plickert, G., Kroiher, M. and Munck, A.
Cell proliferation and early differentiation during embryonic development and metamorphosis of *Hydractinia echinata* 795
